

Estates Consumables: electrical, plumbing and heating supplies

Contract duration: 01/02/2014 - 31/01/2017

North of England
Commercial Procurement Collaborative

Background to contract

The NHS spend on estates consumables plays a crucial and significant part of the department's budget with spend typically being placed for a wide range of products delivered by a number of suppliers.

The NOE CPC arrangement covers:

Lot 1 – Plumbing & heating supplies

Lot 2 – Electrical products

Following a further competition under the CCS Building Materials and Associated Managed Services framework (RM632), NOE CPC has established sole supplier arrangements for Lot 1 - plumbing and Lot 2 - electrical consumables as a simplified means of procuring required estates consumables.

Open to NOE CPC members, the arrangement offers service efficiencies and cost savings to the NHS under a collaborative and consistent approach to the market.
