

# Medical and Surgical Equipment (hardware)

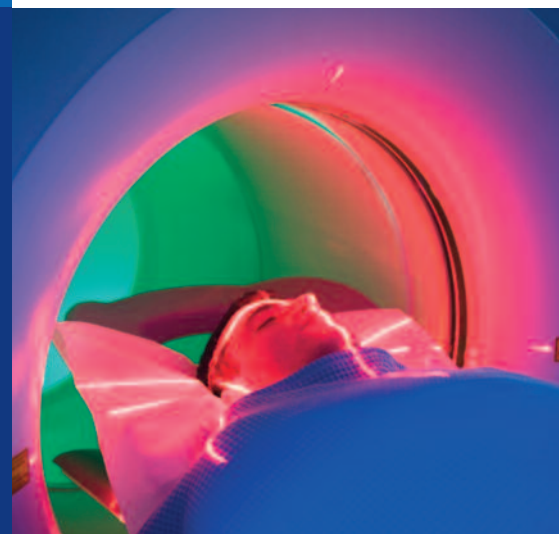

Contract duration: 01/06/2014 - 31/05/2018

North of England  
Commercial Procurement Collaborative

## Background to contract

The overall aim of this project was to provide a framework for NOE CPC member trusts, including any new members who join NOE CPC in the future, for the provision of medical and surgical equipment. This framework has been designed to be used in acute hospital trusts, community trusts, CCGs etc. Different contracting options are available for the provision of medical equipment.

## Contract options

### Capital purchase

Via either call off or RFQ – free of charge to members

### Lease

Via RFQ – free of charge to members

### Managed equipment service

Charges for members may apply dependent on value, complexity and support requirements.

### Turn key solutions

Charges for members may apply dependent on value, complexity and support requirements.

### Whole life cost

Options are available to look at financial costs which are associated with equipment life span

### Backup equipment

Long/short term provision equipment loan

### Revenue/Consumables based purchase options

Reagent rental options against equipment modalities this will include consumables based equipment options. Consumable usage will be key factor against this provision against the amount of equipment needed.

## Benefits

Customers will have a quicker process for accessing medical devices, improved access to up to date technology with installation and implementation process times kept to a minimum.

Direct customer and supplier relationships with no barriers keeping NOE CPC informed of the process within every step.

The framework enables single items to be called off either by request for quotation or single item call off where applicable.

Innovative technology will also be captured and marketed to all participants during the life of the framework enabling customers to be updated when new equipment is launched.

The Medical and Surgical Equipment framework provides users with a variety of different routes of purchase where currently Capital Purchases are not a viable option within the current climate.

Take maximum advantage of NOE CPC's buying power in this market.

Standardised and agreed contractual terms and conditions.

Value for money achieved through competitive market testing.

Due diligence against the suppliers ensuring that providers are suitable.

No further OJEU required.
