

# Radiopharmaceuticals and Related Consumables

North of England  
Commercial Procurement Collaborative

Contract duration: 01/06/2014–31/05/2018

## Background to contract

This is a renewal of the previous NOE CPC Framework for the provision of radiopharmaceuticals which over its lifetime had delivered substantial savings and offered fixed pricing throughout its duration.

Framework includes:

- Generators
- Dry Kits
- Radiopharmaceuticals
- Therapy Capsules
- PET

Generator accessories, secondary shielding, elution tools, saline, vials and returns paperwork provided FOC

The robust tendering process has ensured that NOE CPC has a reliable, flexible framework which is responsive to its customer's needs.

The suppliers have unique products that enhance patient care and meet the ever increasing demands of healthcare professionals.

## Benefits to trust

- Cash releasing benefits
- Contract compliance
- Improvements on service
- Prices fixed for the first 3 years (except PET)
- Low prices are offered to all, regardless of amount spent or quantity purchased

- Trusts have the freedom to select the most appropriate products for their patients and departments without penalty
- £7k worth of accessories FOC with each generator.

## Testimonial

***"Excellent and most useful tender evaluation documents. Thanks again for all your efforts and those of your team."***

Ian Belton, Consultant Medical Physicist,  
Head of Nuclear Medicine Services,  
North Cumbria University Hospitals NHS  
Trust

## Appointed suppliers

- Alliance Medical Radiopharmacy
- Alliance Molecular Ltd
- Diagnostic Imaging Ltd
- GE Healthcare
- Imaging Equipment Ltd
- Mallinckrodt RP UK Ltd
