

# Healthcare Clinical Information Systems

Framework duration: 16/02/2015–15/02/2019  
(with option to extend until 15/02/2021)

## Background to contract

This framework offers NHS organisations a compliant, efficient and consistent sourcing route for the procurement of a comprehensive range of clinical information systems used across the healthcare sector.

Solutions which can be procured under this framework include; Core Clinical Information Systems, Integrated Emergency Care Systems, Theatre Systems, Child Health Systems, Maternity Systems and E-Prescribing Systems.

### Working together with NHS SBS to procure Healthcare Clinical Information Systems

This agreement is the output of an NHS SBS led procurement, with NOE CPC and NHS SBS then working together to support NHS organisations across England to access and utilise the agreement in order to deliver best practice and efficient contracting solutions for these ICT systems across the healthcare landscape.

#### The advantages of such an approach include:

- Avoids duplication of effort for NHS and suppliers
- Supports and promotes the use and adoption of a single framework agreement within NHS
- Provides trusts with access to this agreement through their procurement partner of choice (NOE CPC or NHS SBS)

- Gives access to a range of support options for NHS organisations wishing to undertake these complex procurements
- Adoption of a common approach to further competitions across the market.

#### What does it cover?

- **Lot 1:** Core Healthcare Clinical Information Systems – applicable to all areas of healthcare
- **Lot 2:** Integrated Emergency Care Systems
- **Lot 3:** Theatre Systems
- **Lot 4:** Child Health
- **Lot 5:** Maternity Systems
- **Lot 6:** Electronic Prescribing Systems – applicable to all areas of healthcare.

### Benefits

#### Three implementation support options available

Trusts have the ability to choose between Guidance, Light Touch or Full Support options to help implementation.

#### OJEU avoidance

With much of the legwork already completed, the framework will enable providers to avoid having to go through the full OJEU process.

#### Long term benefits

Ability to award a contract for up to 7 years, allowing customers and suppliers to enter into a long-term commercial relationship.

#### Cost avoidance

Customers will be able to avoid the cost of running complex procurements themselves.

#### Agile framework

The appointed suppliers will be able to bring forward new release throughout the life of the agreement.
